TERMS

All bills are subject to 2 per cent discount within 10 days from invoice date. Sixty days net. Sight draft, plus interest thereafter.

Shipments are forwarded by best carrier, in our judgment, at time of delivery, unless otherwise specified by customer.

First-class stock is carefully packed when shipment is made, and we hold good order receipt from the transportation company. Our responsibility ceases thereafter. If the stock reaches you in bad condition, notify agent and bring claim against the delivery company for damage by their negligence, as no allowance for this cause can or will be made by us.

All items in this list are offered subject to crop deliveries or failures, and being unsold on receipt of order, and other conditions beyond our control, and ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

Bulbs, whether shipped on arrival or placed in cold storage for later delivery, may be examined at time of arrival if desired, but no claims will be entertained at a later date. As to all items other than bulbs, claims must be made within five days after receipt or they cannot be recognized.

In the interest of time saving, we ask that you authorize us, when necessary, to substitute with the nearest similar size or variety.

Discounts for cash with order, applying on orders from \$5.00 up.

FIELD OF "SSS" CERTIFIED EASTER LILIES

What other growers say—

A very large grower in New England told our representatives: "Your lilies were the finest we ever had on this place."

Another grower in the South: "This is the first year in six I have ever gotten 6-7/8 bud count on 7/8 in. bulbs."

highest bud count

GUS BORG'S FLOWERS—

Decatur, Ga. Having grown your Croft Lilies exclusively for the past 12 years with excellent results, I wish to say that our Crofts this past Easter were the best we ever had, with the highest bud count also. All this in spite of adverse conditions in our new greenhouses. On December 20-22 we potted 1800 of your Crofts. Our heating system due to unforeseen delays, was not in operation until Feb. 20, after which date we were able to apply regular heat. The winter this year was extremely severe even down here, but we finished all our Crofts except 58 pots in ample time for Easter. It was a pleasure to fill our Easter orders with such fine lilies, with a heavy bloom count.

RUBRUM MAGNIFICUM

LILIUM REGALE (Oregon Grown)

One of the finest most beautiful of all Lilies, and certainly one of the easiest to grow, thriving in a great variety of soils. Slender stems, crowned with several large, funnel-shaped flowers variably wine-colored without, pure white on the face, clear yellow within the tube; anthers golden. Vigorous grower, attaining sometimes as high as twenty flowers or even more on a single stem. Stem rooting. Plant the bulb 8" deep in any good well drained loam, with or without lime, preferably in a sunny position. Height 4-6 ft. July flowering.

MINIATURE ROSES

F.O.B. PENNSYLVANIA SHIPPING POINT

Miniature Roses are permanently tiny, hardy outdoor plants, as hardy as regular H. T. Garden Roses. They should not be confused with Polyantha Roses. These miniatures grow only about 6 to 12 inches high, with blooms the size of a 5 or 10 cent piece when fully open.

Miniature Roses are shipped from September until May, from 3 inch pots with soil on their roots, and each plant is wrapped with Sphagnum moss in wax paper. On dormant plants shipped after Dec. 1st tops are cut back about 1 inch to assure vigorous, symmetrical growth from the base.

For over the counter sales pot them in 3 or 4 inch pots and bring into growth in a greenhouse or out of doors.

Prices quoted are on orders for 100 plants or more. Free truck delivery in metropolitan area. Longer distances at cost. Packing extra if by express. Discount on orders 1000 or more 10%.

Fall shipment to October only at above prices. Later deliveries out of storage, Nov to Dec. subject to 10% additional; during Jan. 15%. Feb. 20% more, over fall prices on orders received prior to Sept.

HANDLING AFTER RECEIPT OF PLANTS: Thoroughly water rootballs and store in a light and cool, 45-50° greenhouse. Pot or plant in moist peat and never allow to dry out. For early blooming select plants with well developed buds. Forcing of CHRISTMAS varieties can begin in November at 60°, gradually increasing night temperatures to 70°, with frequent syringing to help buds to break, without blasting. EARLY varieties for January blooming start middle of December at 55-60° for 2 weeks, then increasing to 70°; MIDSEASON varieties for Feb.-March blooming allow 3 weeks at 70°; if wanted for Easter these may have to be held near 40°. Varieties marked LATE, to bring in for Easter, keep at 40° or slightly below, to keep the buds from moving, until about 3 weeks before Easter, then either apply heat, or hold back, as needed—if necessary applying shading.

CORAL BELLE SUPREME. New Patented. Sport of Coral Bells. Flowers twice as large as its parent. 3-4 hose in hose, semi-double and deeper pink. Early mid-season, profuse bloomer. Heavier branches than parent. Propagates easy. Subject to signed agreements.

POTS-GRO-TAINERS-PLANT BANDS

BIRD Vita-Bands

TOM THUMB FLATS

Eliminate transplant shock with Bird Vita-Bands — get plenty of "sales sock" into luxurious plants that are economical to grow, mature earlier, command top prices.

You get better plants because Vita-Bands eliminate transplant shock by containing roots until transplant time. Vita nutrient feeds plant during initial growth. There's no nitrogen depletion of soil. Plants mature 7 to 10 days earlier.

Vita-Band "10" contains root growth from 8 to 10 weeks on annuals, perennials and vegetable plants. Vita-Band "H" is heavier — for growing periods up to 40 weeks. Vita-Band "D" contains growth until you let roots through — is not removed at transplant time.

Bird Vita-Bands are available in 8 sizes. They're inexpensive — average price on popular sizes is less than half-a-cent each. Order a supply now!

JIFFY-POTS

SAVES LABOR IN POTTING—FASTER, BETTER GROWTH

ROOTS GROW RIGHT THROUGH POT WALLS

To establish young plants when tight schedules do not permit direct benching, use nutrient treated Jiffy-Pots. These pots are molded from 75 per cent Peat and 25 per cent wood pulp, and contain 1.3 per cent Nitrogen, 1 per cent Phosphoric Acid and 1.6 per cent Potash. They are weed disease free.

Plants grow faster and make more vigorous and rapid growth than plants grown in other types of containers. Nutrient treated Peat Pots dry out slower than clay pots, therefore require less frequent watering. Because the roots penetrate the wall of the nutrient treated Peat Pot, there is no knocking out, thereby saving time and labor.

Growers Everywhere Agree! IT PAYS TO OWN AN S.S.S. AUTOMATIC WATER ROBOT

BECAUSE "IT PROPERLY APPLIES WATER BETTER THAN BY HAND" . . .
"SAVES MONEY" . . . "SAVES WATERING TIME" . . . "RELEASES A MAN
TO DO OTHER WORK"

1—AUTOMATIC SHUTOFF

Saves you time and labor. The Water Robot waters better than manual watering and automatically shuts off at the machine when two benches or beds have been watered as you directed. All done with 1/3 H.P. Electric Motor.

2—AUTOMATIC SHUT OFF ALARM

The S.S.S. Automatic Water Robot delivers as much or as little liquid as you require. Water or liquid fertilizer passes freely with no constriction of pressure or volume. The convenient shut off alarm tells you when the job is done.

3—AUTOMATIC LEVEL HOSE WINDER

It is not necessary to have the reel aligned perfectly with the bench or walk because the Automatic Level Hose Winder prevents the hose from tangling or piling up on the reel.

4—MICRO-SWITCH CONTROLS

Guards against spot flooding. Especially when it encounters an overload, the Robot automatically stops winding . . . automatically shuts itself off.

5—VARIABLE SPEED DRIVE

Speed of winding can be adjusted from 2 to 3 feet per minute.

6—RUBBER-TIRED WHEELS

Makes it easy for one man to move.

7—ADJUSTABLE RISER

The telescope-like riser on the watering sled allows quick and easy adjusting of the nozzles at the required height.

8—COMPACTNESS

Maximum width of Water Robot is only 24 in. with a 125 ft. reel. Only 28 in. wide with a 200 ft. reel. Easily passes through practically any door or end aisle. Turns completely around in its own 36 in. length.

JOHN FRERIKS

Babylon, L.I., New York

July 22, 1957

Dear Mr. Skidell:

Your Water Robot gives me much time to go fishing instead of hand watering. I have never had better quality Carnations in my many years of growing. This due to the efficient performance which the Robot provides. I don't know what I would do without it.

Sincerely yours,
John Freriks

PLANTMIST

The Only Complete Misting System

Installation as Easy as Hanging
Curtains.

Now every grower can afford to mist his greenhouse with inexpensive plastic lined Aluminum pipe and nozzles.

1. Corrosion free, no nozzle clog from scale build up in pipe.
2. 90% labor removed installing, we do most of labor for you.
3. Hang like curtains — spot your hangers suspend and join couplings.
4. Light weight — 10 foot length — 1 1/4 lbs.
5. No drilling or tapping or threading pipe necessary.
6. Inexpensive.
7. Operates on low pressure water.
8. Plastic lined aluminum pipe thru out.
9. Nozzles deliver fine mist.
10. All you do is paint joints and push the pipe lengths together.
11. Pipe comes in 10 foot lengths with nozzles accurately placed for optimum mist control.
12. Adjustable hangers for leveling water lines, adjust height over plants.
13. Line hung in walk will mist two 4' benches.
14. Suitable water strainer supplied.
15. Suitable timing device supplied.
16. Portability—if necessary, can be moved from one house to another.

Write for questionnaire to be filled out which will give us the necessary information to quote you a price. A small demonstration model of Plastic Lined Aluminum Pipe and Nozzles may be had on request. This demonstrator will fit the male connection on your watering hose. **WRITE FOR IT TODAY.**
